## “TUNE” Your Network with Data-Smart, Inc.

### And Save up to 20% on Voice & Data Service

The only time your network performance seems to be called into question is when your most mission-critical resources aren't working.

That's why Data-Smart has teamed up with City Communications and created the Total Universal Network Evaluation (TUNE). It's our FREE multi-point network performance check that helps you assess the efficiency and reliability of voice and data services, eliminating waste and maximizing the return on your communications investment.

As a provider of Tier 1 carrier-neutral voice and data services, City Communications delivers a powerful one-two punch of leading edge technological solutions and an unrivaled reputation for customer service, ensuring that your network maintains peak performance when you need it.

Whether you're seeking to migrate to a VoIP-enabled environment or to implement around-the-clock network management and monitoring, City Communications' TUNE is the first step toward attaining maximum reliability.

Total Universal Network Evaluation (TUNE) is a five-step review of the following services: Local, Long Distance, Internet, Data, and subsequent service proposal. Average communications savings range from 11-20% based on aggregated savings of actual customer assessments in 2010. No purchase necessary.

Recommended by:

#### TOTAL

A complete evaluation of all fixed and variable monthly communication services costs and a complete network services inventory.

#### UNIVERSAL

A company-wide analysis of all communications services including local services, long distance services, Internet, WAN and data connectivity.

#### NETWORK

A thorough review of all services measured by the month, by the minute, by the megabit, or by the mile.

#### EVALUATION

A reference point for establishing quantifiable benchmarks which can be used to eliminate waste and excessive cost while improving your operational efficiency.
