Builders License # BC449203

This large contemporary open kitchen plan – nearly 700 sq. ft. – is a MUST SEE this Remodelers Tour. Not only did Bricewood design a custom solution to completely move the kitchen to the opposite side of the room to create and take advantage of a newly opened view of their wooded lot, they also included a sitting area with an acoustic slat wood ceiling, a large walk-in pantry with 360° lighting, and a one-of-a-kind bar and media area. Flowing horizontal-grained custom walnut cabinets, quartz, limestone, stainless steel and Dekton countertops, and a unique Ortal fireplace with 2Stone cement veneer also accent the space. Come see the attention to detail for yourself!

Project Goals:

1. Open the view with as much window space as possible.
2. Make it WARM. Heated floors and triple pane windows.
3. Extensive, functional countertop space.
4. Double the storage space.
