### Project Goals:

1. Open the kitchen by removing a wall of closets into the hallway and a wall into an under-used sitting area.
2. Create a large kitchen for the Home Owner's gourmet cooking skills with room for at least two cooks.
3. Create a large island for family and friends to gather around.
4. Create a kitchen with minimal upper cabinets that still satisfies the Home Owner's storage needs.

AFTER

The transformation of this home and kitchen is amazing. A grouping of small rooms including a hallway with closets and a narrow "corridor" kitchen were demolished to create a large open kitchen with a fabulous island. The kitchen now opens to the entry of the home and creates a warm welcome for friends and family to be entertained. The island is a natural gathering place. The 36" gas range and tiled back splash is the focal point. Come and experience another transformation by Beyond Kitchens.
